**NOTICE OF APPLICATION  
Southern California Edison Company's Request to Increase Water Rates  
APPLICATION A.20-10-018**

**Why am I receiving this notice?**

On October 30, 2020, Southern California Edison Company (SCE) filed with the California Public Utilities Commission (CPUC) SCE's Application No. 20-10-018 for authority to increase rates for water service on Santa Catalina Island (Catalina) and recover costs from water and electric customers. SCE is requesting a total of \$9.312 million in authorized revenues in its application.

If the CPUC approves this application, SCE will recover forecasted costs in rates over a five-year period beginning in 2022 and ending in 2026. This will impact your bill.

**Why is SCE requesting this rate increase?**

SCE is requesting this rate increase to recover:

- Operating expenses required to safely and effectively operate the Catalina water utility;
- Infrastructure necessary to produce and distribute safe drinking water to customers and visitors to Catalina; and
- Historical capital expenditures for water utility plant in service, not in authorized rate base, including a fair return on rate base;
- Incremental Operations and Maintenance expense due to the recent historic drought and lost revenues due to the drought and implementing the Staged Water Conservation and Rationing Plan; and
- Deferred revenues resulting from SCE's five-year revenue-requirement phase-in proposal.

**How could this affect my water bill?**

If SCE's rate request is approved by the CPUC, there will be a five-year rate increase beginning in 2022. The average residential bill with a 5/8" meter using 1,466 gallons per month would increase by approximately \$29.03 or 40% per month in 2022 and up to approximately \$110.52 or 153% in 2026. In the tables below, SCE is showing the impact of the initial rate increase in Year 1 as well as the impact to collect the full revenue requirement in Year 5. The Year 1 proposed rate change in Table 1 is calculated above current authorized rates. The Year 5 rate change in Table 2 is calculated above the proposed Year 4 rates.
